Wrapsoody

Intelligent Digital Document Platform
A new way to share, secure and manage documents

Fasoo

Reinventing Security & Productivity

Overview

Today's challenges in document management

Organizations today still have a variety of issues and challenges managing documents, even though they have deployed Enterprise Document Management (EDM), Enterprise Content Management (ECM) or recently Enterprise File Sync & Share (EFSS).

According to IDC, 48% of workers have emailed the wrong version of a file to a colleague or client, while 81% found themselves working on the wrong version by mistake.

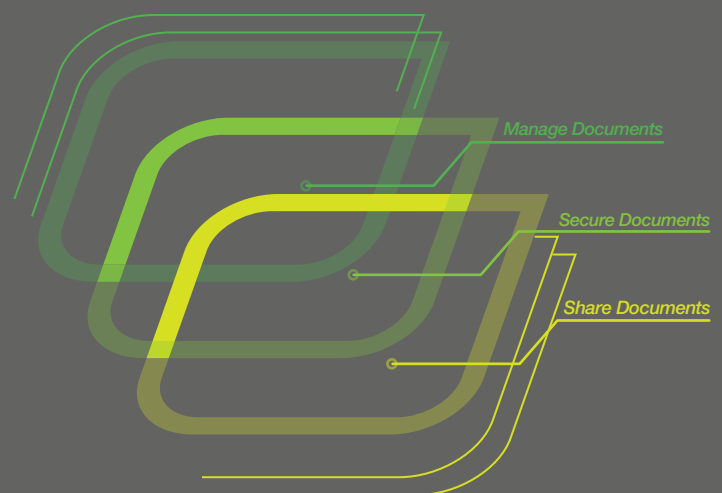

Many documents still remain unmanaged. Redundant copies can be found easily on servers and PCs. A lot of emails, messages and calls are exchanged just to find the right version of a file. Huge amount of time and resources are being wasted in working on documents.

How to reinvent legacy document management

- ☑ Identify document and eliminate duplications
- ☑ Manage documents in PCs even if they are checked out from a managed repository
- ☑ Sync and control version automatically with minimum user intervention
- ☑ Integrate documents in different systems including EDM, ECM, EFSS, ERP and Email
- ☑ Collect the actual data about documents usage, not the data about downloads
- ☑ Set up the security policy on document from the beginning

A new way to share, secure and manage documents

- Wrapsody is an enterprise grade platform that manages and integrates all your documents no matter where they are.
- Wrapsody is a performance enhancement solution that helps you to share documents efficiently, save resources eliminating redundancies and focus on your job.
- Wrapsody is a document security solution by design that prevents document breaches from the origin without compromising usability.

Intelligent Digital Document Platform

Intelligent?

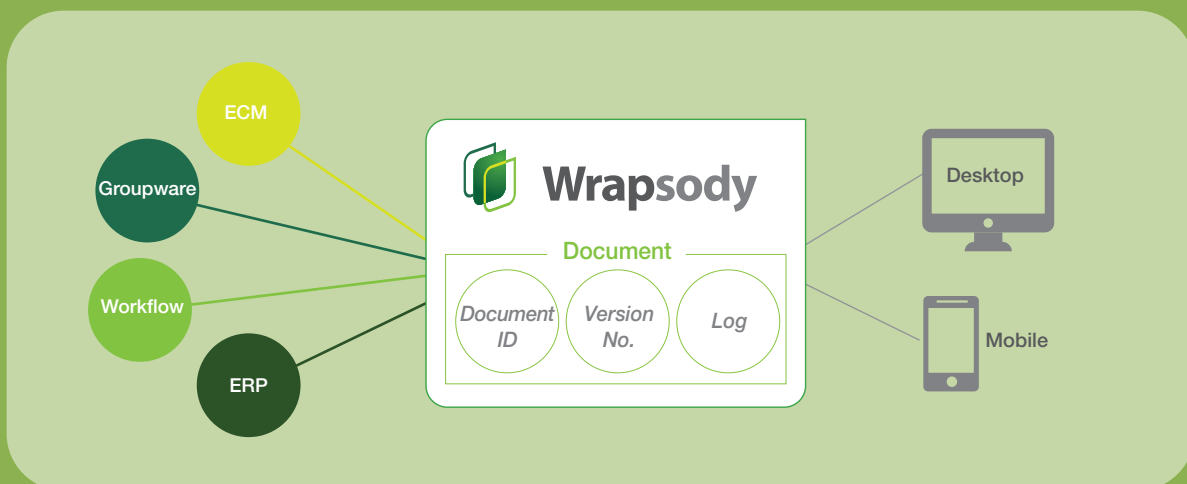

Many users are often frustrated and tired of searching for a file that they are looking for.

- Wrapsody helps to locate documents quickly through different approaches, for example, your own document workspace, dynamic tag view and branch map of your files, along with all the common search tools.
- Wrapsody offers your document usage in real time for you to work smart with your documents.
- Wrapsody provides you with intelligent analytics about your people's performance related to documents.

Digital document platform?

Document management so far has been a digital replica of what's been done in paper-based document management.

- Wrapsody is invented to manage digital documents digitally.
- Each Wrapsody document carries a unique document ID and its version number wherever it goes.
- Wrapsody provides APIs to interconnect all documents that reside in the silos of document management systems.
- Wrapsody collects the real usage log of documents no matter where they are.

Benefits

Better and more collaboration

Wrapsody enables you to share information easily and boosts collaboration among your colleagues.

Increasing your digital assets

Wrapsody guarantees to retain every copy of your digital assets created by your employees without duplication and mitigate risks from potential ransomware attacks.

Document security by design

Wrapsody offers access control and audit trail from the beginning wherever documents travel and an embedded option for Enterprise DRM to enhance security.

Key Features

Sync and version control

Have the latest version anytime and anywhere

Analytics on document usage

Collect document usage log and provide analytics on their patterns

Backup

Backup automatically without duplication and restore them instantly

Mobile accessibility

Access the same documents on mobile devices anytime as on your desktop

Chat on documents

Share comments and opinions with colleagues that are bound to documents

Search

Provide tools to locate a file intuitively from diverse perspectives

Interface

Integrate with 3rd party systems through APIs

Security

Protect your digital assets against hackers and insiders all together
